

HDMI Series Cameras- EX-HD200CP

EX-HD series with HDMI output is the latest developed HFR (high frame rates) digital camera by Contrasttech. It is the best choice for cost-efficient solutions.

Meanwhile HDMI interface could direct input image to display without PC. Installation, connection and maintenance are more simply, convenient and efficient. SD card storage time is less than 1S and storage format is BMP. Infrared remote control directly controls camera parameters adjustment and menu display function.

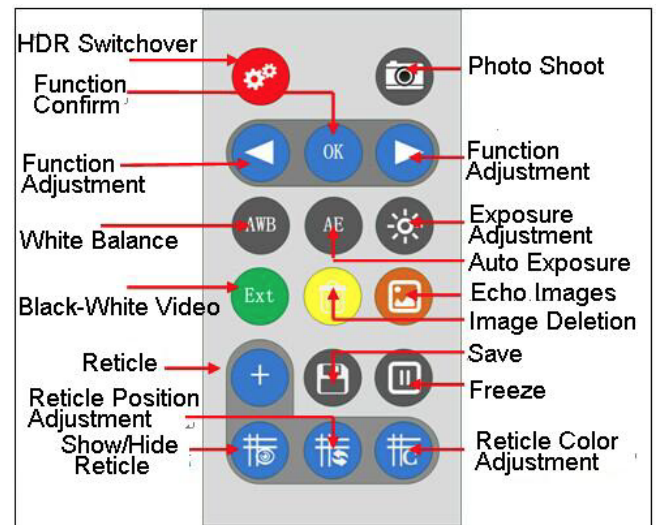

FEATURES

- SONY high sensitivity, low noise sensor
- Full HDMI 1080P HD Image Display
- Adjust parameter by remote control
- Available with SD Card slot
